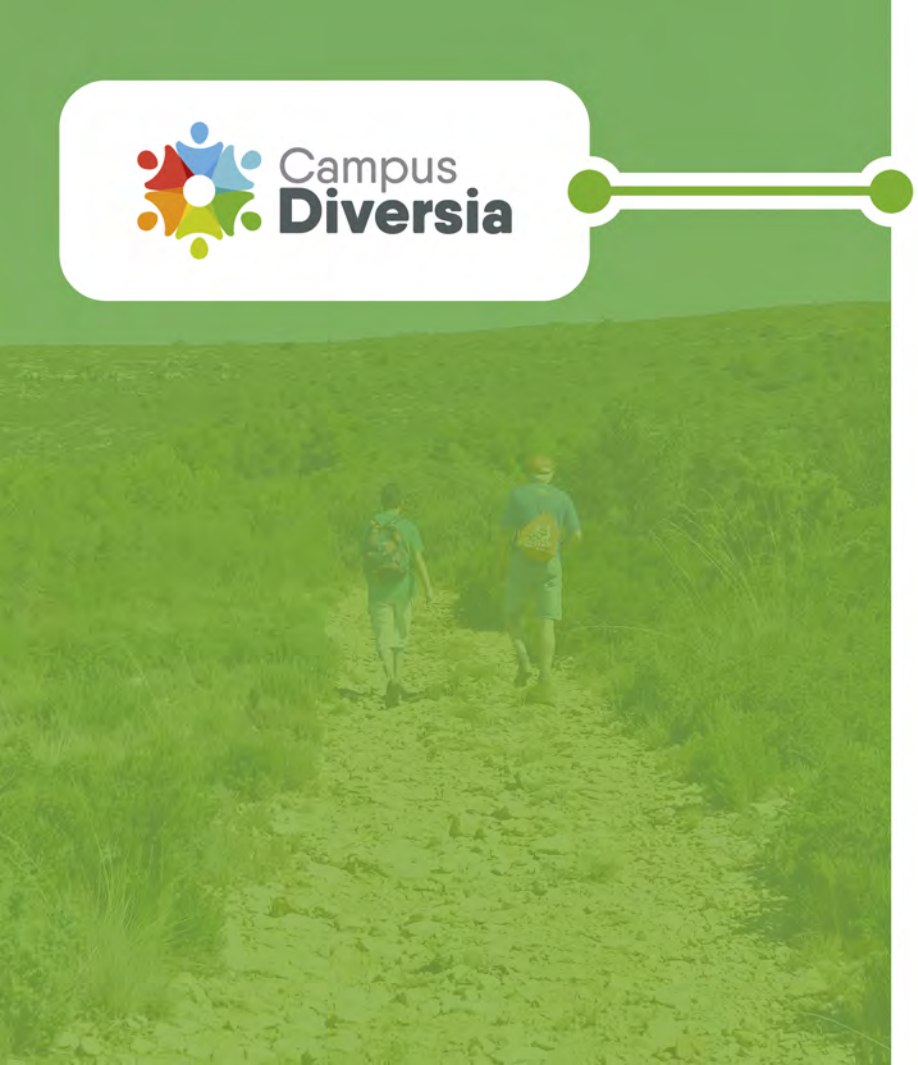
Welcome to nature

Campus Diversia



Campus Diversia

WHAT IS IT?

Campus Diversia is a singular Project and it takes place in the Finca Mijares of Yátova (Valencia, Spain). It's a natural environment of 412 hectares irrigated by the river Mijares and it has extensive forests, vineyards, olive groves, irrigated lands with ditches, some of them built by the Arabs more than 800 years ago.

It is an immense place full of history, which has an enormous farmhouse of the nineteenth century, where groups from associations, schools, entities can stay to enjoy nature for some days. In this place can be organized meetings in which people can exchange experiences between family members, professionals, organizations, experts, researchers...

Job training and environmental employment

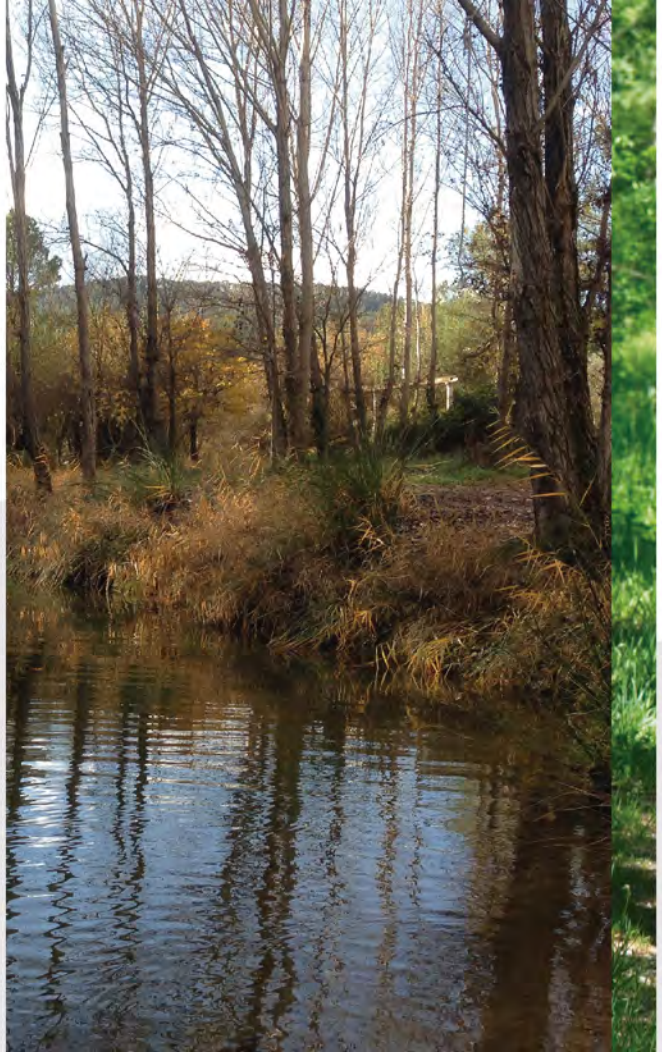
It includes the training and employments of people with different types of disabilities and persons in situations of social exclusion. Special employment center, we currently produce our oil and our wine.

Youth and social activities

We constitute a reference center for the training of leisure educators, as well as it would be set up as a center of educational resources and equipment of socio-cultural animation to the service of the youth network.

Free time and leisure reference space to social entities

Environmental resource designed to promote the social participation and community service provide.



Sport activities in the rural environment

The Campus aims to be a meeting place to practice inclusive sport in the natural environment with accessible routes and trails.

Rural Tourism and family leisure

Campus Diversia integrates different activities of family coexistence and rural development, together with a wide proposal of respite and educational programs.

Investigation

Seminars, workshops, meetings, and training for companies. Investigation, innovation and transference of the traditional uses of the territory, the agricultural and livestock exploitation, the stewardship and the landscape recuperation, the ethnographic heritage as well as the sustainability exploitation of the natural resources are enhanced.
